

Tribos 501

Course by Jan Schünemann

introduction to the systematic of total prosthesis

New generations of prosthesis acrylics and synthetic teeth allows to create a natural looking reproduction of gingival parts as well as tooth parts of a prosthesis. With this materials it is possible to explore the new fields of total implantology as well as geroprosthodontics. During the course the upper and lower jaw will be created in consideration of everyday works necessities.

The course program is the following:

1. Setting up of anterior and posterior teeth (upper and lower jaw)
2. Natural modeling of gingival parts
3. Duplication
4. Finishing of duplication
5. Cleaning and preparation for finishing
6. Individual coloring of gingival parts
7. Casting
8. Working out
9. Polishing
10. Discussion of results

Course fee – \$680
